Date Prepared:

April 16, 1999

Trade Name:

SpermRinse™ -20/ -100

Common Name:

Assisted Reproduction Media

Classification Name:

Reproductive Media and Supplements

(21 C.F.R. § 884.6180)

Predicate Device:

Substantial equivalence established by comparison to

category of Reproductive Media (21 C.F.R.)

884,6180) as provided in the FDA's Notice of Final

Rule, 63 Fed. Reg. 48428 (Sept. 10, 1998).

#### Description of the Device:

Sperm Rinse<sup>24</sup> -20/-100 is a modified HTF medium buffered with bicarbonate and HEPES for use in assisted reproduction procedures. Gentamicin is included as a preservative. Ready to use after pre-equilibration at  $+37^{\circ}$ C and 5 % CO<sub>2</sub>.

#### Intended Use:

SpermRinse™ -20/-100 is intended to be used for the preparation of sperm, for example the washing of sperm after gradient separation or swim-up procedures.

K000621 Page 20f2

# Technological Characteristics:

The technological characteristics of SpermRinse™ -20/ -100 are identical to other legally marketed media classified under 21 C.F.R. § 884.6180, Reproductive Media and Supplements.

## Testing Performed:

Prior to and as a condition for market release, each lot of SpermRinse<sup>TM</sup> -20/-100 is assayed by Human Sperm Survival Assay and Lumulus Amebocyte Lysate (LAL) Assay. These assays are intended to assure that the media is suitable for its intended use and does not contain unacceptable levels of toxins. Information on these assays is provided in the labeling of the products and on a LOT-specific Certificate of Analysis provided with each delivery.

The Mouse Embryos Assay is not performed on SpermRinse™ -20/-100 because the composition of the product is neither intended for nor compatible with embryo development.

SpermRinse<sup>TM</sup> -20/-100 has been used for sperm preparation procedures for many years at many different assisted reproduction facilities. Clinical experience during that time has established its safety and effectiveness for such use.

#### Additional Information:

Donors of the source material for the human serum albumin are screened for CJD. The source material is also tested for HIV and hepatitis.

SpermRinse™-20/-100 Dated: April 21, 2000 Received: April 24, 2000 Regulatory Class: II

21 CFR §884.6180/Procode: 85 MQL

#### Dear Mr. Yingling:

We have reviewed your Section 510(k) notification of intent to market the device referenced above and we have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration.

If your device is classified (see above) into either class II (Special Controls) or class III (Premarket Approval), it may be subject to such additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 895. A substantially equivalent determination assumes compliance with the Current Good Manufacturing Practice requirements, as set forth in the Quality System Regulation (QS) for Medical Devices: General regulation (21 CFR Part 820) and that, through periodic QS inspections, the Food and Drug Administration (FDA) will verify such assumptions. Failure to comply with the GMP regulation may result in regulatory action. In addition, FDA may publish further announcements concerning your device in the Federal Register. Please note: this response to your premarket notification submission does not affect any obligation you might have under sections 531 through 542 of the Act for devices under the Electronic Product Radiation Control provisions, or other Federal laws or regulations.

This letter will allow you to begin marketing your device as described in your 510(k) premarket notification. The FDA finding of substantial equivalence of your device to a legally marketed predicate device results in a classification for your device and thus. permits your device to proceed to the market.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801 and additionally 809.10 for in vitro diagnostic devices), please contact the Office of Compliance at (301) 594-4591. Additionally, for questions on the promotion and advertising of your device, please contact the Office of Compliance at (301) 594-4639. Also, please note the regulation entitled, "Misbranding by reference to premarket notification" (21CFR 807.97). Other general information on your responsibilities under the Act may be obtained from the Division of Small Manufacturers Assistance at its toll-free number (800) 638-2041 or (301) 443-6597 or at its internet address "http://www.fda.gov/cdrh/dsma/dsmamain.html".
